

Welcome!

Thank you for your interest in Orthodontics and for choosing our office. We are pleased to enclose some information that we hope you will find informative. Our team is always committed to ensuring that our patients are well educated with regards to their treatment needs.

Your Initial Visit – Complimentary Consultation Appointment

The purpose of the initial consultation appointment is to allow us to become acquainted and give us an opportunity to discuss your needs. We realize that the treatment we recommend is of little value unless it addresses your concerns. During this initial visit, a clinical examination is performed to determine your orthodontics needs. Dr. Abbaszadeh will inform you of any problems and describe the necessary corrective treatment if any. At this appointment, he will also provide you with estimates pertaining to length of treatment and costs. We feel that our patients must be fully educated about their needs and our proposed treatment. It is only then that you are capable of making an informed decision about how you wish to proceed.

Diagnostic Records & Case Analysis

Before orthodontic treatment can begin, diagnostic radiographs (X-rays), facial and oral photographs and 3D digital models are necessary for Dr. Abbaszadeh to confirm his diagnosis and establish a customized treatment plan. In certain circumstances, we can show you what the teeth will look like when straightened! It is only after a thorough analysis of these records that a treatment plan can be finalized. Please keep in mind that a complete examination by your dentist is necessary before starting orthodontic treatment.

Case Presentation

Dr. Abbaszadeh will discuss the problems and treatment goals in great detail using the study models and x-rays. Length of treatment will be confirmed along with the total cost and payment schedule. We can come up with a customized payment option (interest free) just for you to budget the overall costs involved in treatment. ***At this time, we are requesting that only one parent enters our office for a child consultation.***

A few words about Dr. Abbaszadeh...

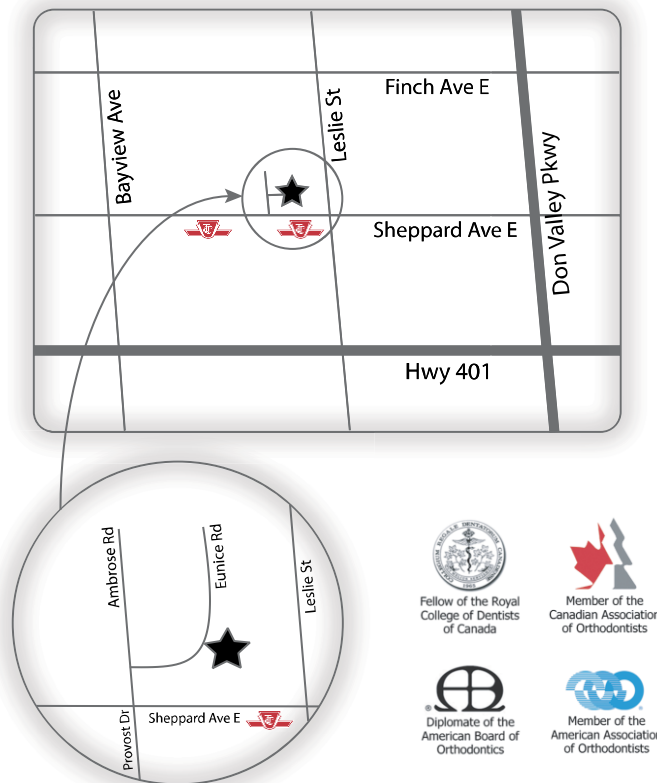

Dr. Shervin Abbaszadeh grew up right here in North York and attended A.Y. Jackson Secondary School. He completed his dental school training with honours at the University of Toronto Dental School which was followed by an internship at the Toronto General Hospital. His passion for Orthodontics took him back to the University of Toronto where he obtained his Orthodontic Specialty Master of Science degree.

He is both a Fellow of the Royal College of Dentists of Canada and an Examiner of this Specialty Board – examining Orthodontists wishing to become licenced in Canada. In addition to being in full time practice, he is a Staff Orthodontist at the Holland Bloorview Kids Rehabilitation Hospital in the Craniofacial Cleft Lip and Palate program, a very fulfilling and challenging position of treating patients with various disabilities. He is a clinical instructor at the University of Toronto, and lectures on a part-time basis. On numerous occasions, he has been asked to lecture at meetings for general dentists and other specialists. Dr. Abbaszadeh is also an Admission interviewer for the University Of Toronto Dental School.
